

How to clean your Aluminium Venetian Blinds

Let ME show you the right way to clean your
Aluminium Venetian Blinds ...

Sleek, contemporary and super easy to keep clean! Aluminium blinds have a modern appeal and will fit seamlessly into modern day life and busy schedules because maintaining them is easy. ME blinds recommends regular dusting and cleaning with warm soapy water to keep your aluminium blinds looking shiny. See our simple steps below for maintaining your blinds.

What you need

- A microfiber cloth
- A duster and dusting spray
- Warm soapy water

Easy Cleaning Tips

Aluminium venetian blinds add a contemporary touch to any home with their slimline look. They come in a range of colours and finishes, including metallic, for those who prefer a modern look and are incredibly versatile. Lightweight and slim, they operate smoothly in front of any window or door. Maintaining them is easy and requires only a few basic steps, but there are a few things you should keep in mind when cleaning your blinds.

- Rotate the slats during cleaning to ensure every angle is dusted
- You can also use a microfiber cloth or the brush attachment of your vacuum to gather dust

- For stains, marks or grease, spray your duster or microfiber cloth with dusting spray and wipe down the slats.
- Alternatively, you can also dip your microfiber cloth in soapy water and wipe down slats
- Don't scrub blinds too hard, as this can damage the slim slats

Operating your blinds

- Pull the tilt control cord to rotate the slats to your lighting and privacy requirements
- Pull the lift control cord down to raise the slats (assist with hand under the bottom bar for large blinds)
- Angle the cord to the side of the blind and release to lock it at the desired height
- Pull down towards the centre of the blind to release the cords to lift or lower the blind
- Hold down clips provided can be installed to keep the bottom rail in position. Gently push the bottom rail towards the hold down clip and pull the bottom rail away from the other end in order to release the bottom rail from the hold down clips

Cleaning your Aluminium Venetian Blinds

Aluminium venetian blinds are an easy-care window fitting – although don't be fooled into thinking that this means they're any less stylish! You'll be very pleased with the contemporary feel that aluminium blinds can add to your home. Dust and dirt can stick to them though, so to keep them looking shiny, follow the steps below.

1. Tilt the slats of your blinds upwards and dust each individually with a duster and dusting spray
2. Turn the blinds downwards and gently dust the other side
3. To remove stubborn marks or dirt, wipe your blinds down with a wet microfiber cloth
4. Allow your blinds to air dry with the slats open

There really isn't much to keeping your aluminium blinds clean. They're highly durable and perfect for wet, humid environments like your bathroom. Regular light, dusting and a wipe down are all they need to keep them in perfect condition.
